Information Security Policy v4.0

Data classification, handling, and protection standards

Version	v4.0
Document Type	Corporate Policy
Classification	Internal
Owner	Enterprise Knowledge Assistant
Effective Date	January 2026

Section 2: Data Classification

- All company data is classified into four levels. Each level has specific handling, storage, and transmission requirements.

Level 1 - Public

- Examples: Marketing materials, website content, published whitepapers.
- Handling: No restrictions.
- Can be shared externally without approval.
- Storage: Any corporate system; cloud storage allowed.
- Encryption: Optional.

Level 2 - Internal

- Examples: Process documents, org charts, internal announcements.
- Handling: For employees and contractors only.
- Must not be shared externally without manager approval.
- Storage: Corporate systems only; no personal cloud storage.
- Encryption: Recommended at rest.

Level 3 - Confidential

- Examples: Employee data, financials, customer PII, source code.
- Handling: Need-to-know basis only.
- Encrypted at rest and in transit (TLS 1.2+).
- External sharing requires DPO (Data Protection Officer) approval.
- Storage: Encrypted corporate systems; access logged.

Level 4 - Restricted

- Examples: Trade secrets, credentials, private keys, board minutes.
- Handling: Strictly need-to-know; all access logged.
- Never shared externally.
- Storage: Hardware security modules (HSMs) or approved vaults.
- Violation is grounds for termination and possible legal action.
