Security Incident Response Procedure

Reporting and response procedures for security incidents

Version	v1.2
Document Type	Corporate Policy
Classification	Internal
Owner	Enterprise Knowledge Assistant
Effective Date	January 2026

Reporting a Phishing Email

- Step 1: Do NOT click any links in the email.
- Step 2: Use the 'Report Phishing' button in Outlook (toolbar).
- Alternatively: forward the email to phishing@company.internal.
- Step 3: Delete the email from your inbox.
- Step 4: If you already clicked a link or entered credentials:
- a. Immediately reset your password (see IT_SOP_PasswordReset.pdf).
- b. Call the IT Security desk at ext. 4700.
- c. Disconnect from the corporate network until cleared.

Response SLAs

- SOC (Security Operations Center) acknowledgement: within 1 business hour.
- Initial assessment: within 4 business hours.
- Containment: within 24 hours for Severity 1 incidents.
- Eradication and recovery: 24-72 hours depending on severity.
- Post-incident review: within 5 business days of closure.

Other Incident Types

- Lost or stolen device: Report immediately to security@company.internal.
- Unauthorized access to systems: Report to SOC via ext. 4700.
- Data leak or breach: Report to DPO immediately at dpo@company.com.
- Do NOT attempt to investigate or remediate on your own.
- All incidents are logged and reviewed by the CISO monthly.

Severity Classification

- Severity 1: Customer data breach, ransomware, total system outage.
- Severity 2: Internal data leak, partial system outage, malware detection.
- Severity 3: Phishing email, policy violation, suspicious activity.
- Severity 4: General security inquiries, training requests.
